Education

Colorado College

May 2025

Bachelor of Arts in Computer Science, Minor in Statistics

GPA: 3.89 | Awards: Dean's List | Thesis: *Analysis of Artificial Intelligence Use at Colorado College*

Experience

Copado

AI Software Engineer

April 2026 – Present

- Own the end-to-end design and development of a dataset-sharing feature for the company's AI platform, enabling users to securely share datasets with one another
- Debug and improve the reliability of agentic AI workflows that let users deploy an AI agent in a VM to run multi-step task sequences on a schedule
- Ship changes across 5 large-scale repositories, spanning agent frameworks and Angular UI, ramping quickly on a substantial production codebase

Software Engineering Intern

January 2026 – March 2026

- Collaborated with architect mentors to master the Copado product suite, implementing Git-based CI/CD pipelines and navigating Salesforce multi-tenant architecture
- Conducted root-cause analysis in mirrored reproduction environments to diagnose and resolve complex deployment errors and customer blockers
- Built autonomous agents and automated testing pipelines, reducing manual development overhead

Farmhouse Chocolates

December 2025 – January 2026

Software Developer Intern

- Developed full-stack web application (React, Node.js, Firebase) to automate inventory tracking and employee task management for local business operations
- Assessed site requirements and conducted workflow analysis to identify pain points in manual processes and design technical solutions

National Science Foundation REU | *Montana State University*

May 2023 – August 2023

Cybersecurity Researcher

- Evaluated effectiveness of Snort intrusion detection software against network-based attacks
- Built Docker-based client-server test environment to simulate network attacks and measure detection accuracy

Projects

Colorado College Artificial Intelligence Taskforce

Thesis

- Developed full-stack analytics platform (React, Python, PostgreSQL) to analyze student LLM usage across 5 departments
- Applied natural language processing techniques to quantify insights from 1,000+ student queries
- Designed and deployed interactive dashboard for professors to view AI usage metrics by course

Technical Skills

Languages: Python, Java, Typescript, JavaScript, R, C, SQL, Apex

Frameworks & Tools: React, Node.js, Angular, PostgreSQL, NoSQL, Firebase, Docker, Git, Salesforce, RESTful API, FastAPI, CI/CD Pipelines
